SEJAL GIRISH BORKAR

Product Designer · Design Engineer · Bengaluru, India

sejalborkar2002@gmail.com · +91-6362518173 · sejalborkar.vercel.app · linkedin.com/in/sejalborkar

Profile

Product designer who ships. B2B SaaS across product surfaces and marketing site, with front-end work merged to a production Next.js codebase.

Professional Experience

GenAI Product Designer (Consultant) · Epifi Technologies (Fi Money)

June 2026 – Present

Tetriz, a B2B engineering-intelligence platform. Two-person design team, working with PM, content and engineering.

- Redesigned a lead-gen assessment: 19 questions, 6 screens, 5 result states, desktop and mobile. Wireframes and clickable prototype, then the shipped React, merged behind a full CI review gate.
- Rebuilt the result screen around the user's own answers and added the email-capture step the flow was missing.
- Restructured the main navigation: split the Product mega-menu in two and cut the feature list from a pillar taxonomy to a flat five.
- Built 5 feature pages in production Next.js and pulled the repeated parts into a shared component library (~20 components).
- Designed the production system behind the company videos, script through final render: reusable skill files in the repo, defined review gates, storyboard time from 4 days to 1.

Design Intern · AppsForBharat

January 2026 – June 2026

- Designed and shipped the company blog start to finish: home, article and category pages, card components, tab navigation, mobile and desktop. Live at blog.appsforbharat.com.
- Built a themed thumbnail system: one visual identity per category, with each post's thumbnail customised within it.
- Built employer-brand campaigns with custom mascots and AI-generated video, working to the brand guidelines and contributing back to them.

Graphic Designer (Freelance)

August 2023 – May 2025

- Two years of client work: posters, logos, banners and social campaigns.

Projects

Sourced · Artist Accountability Platform

UX Case Study

- Mobile case study on telling human and AI artwork apart. Interviewed 25+ artists, mapped the flows and IA, then designed peer verification as the mechanism.

Skills

Product & UX	Design systems, wireframing, prototyping, user research, information architecture
Frontend	Next.js/React codebase work with Claude Code, GitHub PR workflow, design tokens
Tools	Figma, Remotion, Photoshop, Illustrator, Premiere Pro, Canva, Claude Code, ElevenLabs
Craft	Motion design, storyboarding, branding, UX writing, data visualisation

Education

Ramaiah Institute of Technology, Bengaluru

February 2024 – June 2025

Master of Computer Applications · CGPA 8.84
